

Terms and Agreement

Donivra: An AI-Assisted Hair Qualification and Donation Management System
for Hair for Hope Philippines

Supporting the advocacy of hair donation and wig assistance for cancer patients and alopecia warriors.

This document sets the conditions for the responsible use of Donivra by donors, patients or beneficiaries, authorized Hair for Hope Philippines personnel, partner hospital representatives, and approved system users. It is prepared for project and system-use purposes and should be reviewed by the organization before official deployment.

Effective Date: May 22, 2026

Prepared for the Donivra System

Terms and Agreement of the Donivra System

1. Introduction

Welcome to Donivra, a mobile and web-based support system developed to help organize the hair donation and wig assistance process connected with the advocacy of Hair for Hope Philippines.

Hair for Hope Philippines encourages hair donation to help provide wigs for individuals experiencing hair loss, especially cancer patients and alopecia warriors. Donivra supports this advocacy by providing a more organized way to manage donor submissions, donation records, beneficiary requests, hospital coordination, event activities, wig-related records, and donation tracking.

By using Donivra, the user agrees to follow these Terms and Agreement. These terms are intended to protect the users, the organization, the donors, the beneficiaries, and the integrity of the hair donation process.

2. Acceptance of Terms

By creating an account, submitting information, uploading images, joining donation activities, sending a wig request, scanning a QR code, or using any feature of Donivra, the user confirms that they have read, understood, and agreed to these terms.

If a user does not agree with these terms, they should not create an account or continue using the system. For users who are minors or cannot provide consent on their own, a parent, guardian, or authorized representative must guide or approve the use of the system.

3. Purpose of the System

Donivra is intended to support the advocacy and operations of Hair for Hope Philippines by helping organize the process of hair donation and wig assistance. The system may be used for donor registration, hair donation guidance, initial AI-assisted checking, donation status monitoring, donation event coordination, QR code-based tracking, patient or beneficiary wig request submission, hospital referral coordination, wig record management, virtual wig preview, and administrative monitoring.

The system is not intended to replace the compassion, judgment, and manual work involved in the actual advocacy. Donivra is only a support tool that helps make the process more organized, transparent, and easier to monitor.

4. Nature of the Hair for Hope Advocacy

Users understand that Hair for Hope Philippines is an advocacy-driven initiative that supports cancer patients, alopecia warriors, and other individuals experiencing hair loss by helping provide wigs through donated hair and partner support.

The purpose of using Donivra is not commercial selling or personal gain. Donivra is intended to support the donation process, improve record handling, assist communication, and help Hair for Hope Philippines manage donation and wig assistance activities more efficiently. Any user who joins the platform is expected to respect the purpose of the advocacy and the dignity of the people it serves.

5. User Responsibility

Users are responsible for the information, images, and requests they submit through Donivra. All submitted information must be true, complete, and updated to the best of the user's knowledge.

Users must not submit fake names, false donation records, misleading hair images, unauthorized patient information, or any content that may affect the fairness and accuracy of the donation and wig assistance process. Users must also keep their account secure. Login details should not be shared with other people. Any suspicious activity, unauthorized access, or incorrect record should be reported to the administrator or authorized personnel.

6. Donor Submissions and Hair Qualification

Donors may use Donivra to submit personal information, hair-related details, and hair images for initial checking. The system may provide an AI-assisted result based on visible features such as hair length, condition, density, texture, and overall image quality.

Donors understand that AI-assisted checking is only an initial guide. It does not guarantee that the donated hair will be accepted, used, or processed into a wig. Final review and acceptance will still depend on the actual assessment of authorized Hair for Hope Philippines personnel, especially the Specialist or other assigned personnel who will inspect the donated hair based on the organization's standards.

Donors also understand that actual hair donation may still require proper preparation, such as keeping the hair clean, dry, tied or bundled properly, and submitted according to the instructions of Hair for Hope Philippines.

7. AI-Assisted Results and Limitations

Donivra uses AI-assisted features to help provide initial guidance to donors and visual support to patients. These features are created to make the process easier, but they are not perfect.

AI-assisted results may be affected by lighting, camera quality, image angle, background, unclear hair visibility, device limitations, internet connection, and user-provided information. Because of this, the system output should not be treated as final or absolute.

The AI feature cannot fully detect hidden hair damage, internal hair quality, chemical treatment history, scalp condition, medical conditions, or other factors that are not clearly visible in the uploaded image. For this reason, all AI-assisted results must still be reviewed by authorized personnel before any final decision is made.

8. Patient and Beneficiary Requests

Patients or beneficiaries may use Donivra to submit wig assistance requests and monitor the status of their request. The system is intended to make the process clearer and easier to follow.

Submitting a wig request does not automatically guarantee approval, immediate release of a wig, or availability of a preferred wig. Requests may still depend on review, eligibility, available wig records, donated hair supply, partner coordination, and the decision of authorized Hair for Hope Philippines personnel.

Patients and beneficiaries are expected to submit truthful and respectful information. If another person submits a request on behalf of a patient, that person must have proper permission or authority to do so.

9. Hospital and Partner Coordination

Authorized hospital representatives may use Donivra to submit or monitor patient referrals when allowed by Hair for Hope Philippines. Any patient information submitted by a hospital representative must be accurate and shared with proper consent or authority.

Hospital representatives are expected to protect patient privacy and use the system only for legitimate coordination related to wig assistance. Donivra does not replace hospital procedures, medical evaluation, diagnosis, or treatment. The system only supports referral coordination and wig assistance monitoring.

10. Donation Events and QR Tracking

Donivra may be used to support donation drives, event participation, and tracking of hair donations. QR codes may be generated or scanned to help retrieve donation records and update donation status.

The QR code is only a tracking tool. It does not mean that the donated hair is automatically accepted or already processed into a wig. Users must not copy, alter, sell, misuse, or share QR codes for unauthorized purposes. QR codes and donation records should only be used by authorized users for legitimate donation monitoring.

11. Virtual Wig Preview

Donivra may include a virtual wig preview feature for patients or beneficiaries. This feature allows users to see an approximate visual preview of selected wig images.

The virtual wig preview is only for reference. It does not guarantee the actual fit, size, color, volume, comfort, texture, or final appearance of the wig. Actual wig selection, approval, fitting, and release will still depend on Hair for Hope Philippines and its authorized personnel.

12. Privacy and Personal Information

Donivra may collect personal information needed for account creation, donor guidance, hair submission, patient requests, hospital coordination, donation tracking, event participation, wig records, and system monitoring.

This may include names, contact details, account information, donor details, hair images, patient request information, referral details, donation records, QR tracking records, and system activity logs.

Personal information will be used only for legitimate purposes related to the Donivra system and the hair donation and wig assistance process. Donivra must handle personal information with care and in accordance with applicable Philippine privacy laws and organizational rules.

13. Sensitive Information

Some information submitted through Donivra may be sensitive, especially patient-related details, medical-related context, images, and referral information.

Users must only submit sensitive information when it is necessary and when they have the right or permission to do so. Donivra should not be used to expose, spread, or misuse private information about any donor, patient, beneficiary, hospital, or personnel.

Hair for Hope Philippines personnel and authorized users must handle sensitive records with care, confidentiality, and respect.

14. Minors and Guardian Consent

Since hair donation activities and wig assistance may involve minors, Donivra may require consent or assistance from a parent, guardian, or authorized representative.

For minor donors or minor beneficiaries, the parent or guardian must understand the purpose of the system, the information being submitted, and the possible use of submitted records or images for donation and wig assistance processing. Donivra may request additional confirmation when a minor is involved.

15. Proper Use of the System

Users agree to use Donivra only for its intended purpose. The following actions are not allowed:

- Creating fake accounts or pretending to be another person.
- Submitting false donation, patient, hospital, event, or wig request information.
- Uploading misleading, offensive, altered, or unrelated images.
- Using another person's information without permission or authority.
- Misusing QR codes, tracking records, certificates, or donation status updates.
- Accessing records or system features without authorization.
- Attempting to damage, hack, overload, disrupt, or bypass the system.
- Using the platform to sell donated hair or wigs without authorization.
- Using the system in a way that harms the advocacy, the organization, donors, patients, or beneficiaries.

Any misuse of the system may result in account restriction, removal of access, cancellation of submitted records, or further action depending on the seriousness of the violation.

16. No Medical Advice

Donivra is not a medical system and does not provide medical advice, diagnosis, or treatment. Any health-related information in the system is used only to support wig assistance coordination. Patients should still consult licensed medical professionals for medical concerns, treatment decisions, or health-related questions.

17. No Guarantee of Approval or Availability

Using Donivra does not guarantee that a hair donation will be accepted, that a wig request will be approved, or that a wig will be immediately available.

Hair donation and wig assistance depend on several factors, including hair quality, donation requirements, available resources, wig supply, beneficiary needs, partner coordination, and the review of authorized personnel. Donivra only helps organize and monitor the process. It does not control the final outcome.

18. System Availability

Donivra aims to provide a reliable platform, but it may not always be available. The system may experience delays, maintenance, technical errors, internet issues, server problems, API limits, or third-party service interruptions.

Some features, especially AI-assisted checking, map viewing, QR scanning, image upload, and virtual wig preview, may depend on internet connection, device compatibility, camera quality, and third-party tools. Donivra may update, modify, suspend, or improve features when needed to fix errors, improve security, or better support the actual workflow of Hair for Hope Philippines.

19. Third-Party Tools and Services

Donivra may use third-party services for database storage, authentication, maps, AI processing, image processing, hosting, and other technical functions.

These services help the system work properly, but they may also have their own limitations, service interruptions, usage restrictions, or policy changes. Users understand that some system issues may be caused by third-party services outside the direct control of Donivra.

20. Intellectual Property

The Donivra system, including its design, interface, workflow, documentation, diagrams, database structure, source code, and related materials, belongs to the developers or authorized project owners, unless otherwise stated.

Users may not copy, sell, reproduce, modify, or claim ownership of the system without permission. Hair for Hope Philippines-related names, advocacy materials, and official processes remain subject to the rights and approval of Hair for Hope Philippines or its authorized representatives.

21. Account Restriction or Termination

Donivra may restrict, suspend, or terminate an account if the user violates these terms, submits false information, misuses system features, compromises privacy, harms other users, or damages the purpose of the advocacy.

Users may also request account deactivation, subject to recordkeeping requirements. Some records may need to be retained for donation tracking, request history, system security, audit purposes, or legitimate organizational documentation.

22. Changes to the Terms

These Terms and Agreement may be updated when needed to reflect changes in the system, legal requirements, privacy practices, organizational procedures, or Hair for Hope Philippines workflow.

Users may be notified of major updates through the system, email, announcement, or other reasonable means. Continued use of Donivra after changes are posted means that the user accepts the updated terms.

23. Governing Law

These Terms and Agreement shall be governed by the laws of the Republic of the Philippines, including applicable laws on data privacy, electronic transactions, cybercrime, and related regulations.

Any concern, dispute, or complaint related to the use of Donivra should first be reported to the system administrator or authorized Hair for Hope Philippines representative for proper review and resolution.

24. User Agreement

By using Donivra, the user confirms that they understand and agree to these Terms and Agreement.

The user also confirms that they will use the system honestly, respectfully, and only for purposes connected to hair donation, wig assistance, beneficiary support, hospital coordination, and the advocacy of helping cancer patients and alopecia warriors.

Suggested App Confirmation Statements

These optional statements may be placed in the Donivra application as checkboxes before users submit important forms or continue using sensitive features.

☐ General Agreement: I have read, understood, and agree to the Terms and Agreement of the Donivra system. I understand that Donivra supports the hair donation and wig assistance advocacy of Hair for Hope Philippines, and that all AI-assisted results are only support tools and not final decisions.

☐ For Donors: I confirm that the information and hair image I submitted are true to the best of my knowledge. I understand that AI-assisted checking is only an initial guide and does not guarantee final acceptance of my hair donation.

☐ For Patients or Beneficiaries: I confirm that the information submitted for this wig request is accurate and provided with proper consent. I understand that submitting a request does not guarantee approval, wig availability, or immediate release.

☐ For Hospital Representatives: I confirm that I am authorized to submit or manage this patient referral and that the information provided is accurate and shared with proper consent or authority.
